/Emily Bernhardt/
Primary Examiner, Art Unit 1624

The following is an examiner's statement of reasons for allowance: The data presented in an earlier Declaration has been re-presented and clarified in two Declarations filed on 3/3/10, namely by Dr.Bang-Andersen and Dr. Jensen. In view of the marked difference in inhibitory activity of the instant isomer vs corresponding racemate (E) as well as N-methylated isomer (A), the rejection over Bogeso references has been overcome. Commonly assigned 11/816394 (now US Patent No. 7,648,991) is directed to instant compound with the further limitation that the free base be either crystalline or in solid form- neither of which is produced employing applicants' synthesis herein. This is also discussed in the specification of US'991 (cols.2-3). Thus the obviousness-type double patenting rejection is withdrawn. Commonly assigned 11/816403 has gone abandoned prior to any examination and PTO records do not indicate it has been refiled.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
